

SHAPELET DISTANCE ACCELERATOR FSM

op_i indicates the operations performed by the accelerator:

0: Change length and normalize a new pivot shapelet

1: Calculate distance between pivot shapelet and a new target shapelet

- DEPOIS DOS SUM NÃO TEM WR_ADDSUB.
PQ??

For operation 0, consider the signal shapelet in this FSM to mean pivot and
for operation 1, consider the signal shapelet in this FSM to mean target
